Hey Mike, I had an oil leak from that tensioner early on, and my dealer sorted it, under warranty luckily, but they undid those two 8mm bolts and the whole crank timing setup slipped I gather, and they had quite a job finding the right puller to get in and re-set it properly (behind the RH casing). After the 1st service the little wrench indicator on the dash did not reset, how can I do this, or can I do this without the dealer? I cannot find the answer in the owners manual, I can go back to the dealer, but would rather not take the ride over there...Manuales Triumph en Inglés.
