Adolescence (from Latin *adolescere*, meaning 'to grow up') is a transitional stage of physical and psychological development that generally occurs during the period from puberty to legal adulthood (age of majority).

Adolescence is usually associated with the teenage years, but its physical, psychological or cultural expressions may begin earlier and end later. Given that brain regions involved in many social aspects of life are undergoing such extensive changes during adolescence, it is likely that social influences—which also occur through the use of ...J Child Fam Stud (2007) 16:39–47 DOI 10.1007/s10826-006-9066-5 ORIGINAL PAPER Maternal and Paternal Parenting Styles in Adolescents: Associations with Self-Esteem, Depression Abstract Based on a larger longitudinal project of family stress and children's development, the primary objective of the current study was to investigate the relationships between parenting styles and
