Environmental sociology is the study of interactions between societies and their natural environments. The field emphasizes the social factors that influence environmental resource management and cause environmental issues, the processes by which these environmental problems are socially constructed and defined as social issues, and societal responses to these problems. The Silencing Science Tracker is a joint initiative of the Sabin Center for Climate Change Law and the Climate Science Legal Defense Fund. It tracks government attempts to restrict or prohibit scientific research, education or discussion, or the publication or use of scientific information, since the November 2016 election.
