Currently there are over 1,650 entries with more in the works, and all the pages are being constantly revised and improved. Links to new references and online resources are added daily, with an emphasis on those that are free and open access (FOAM websites and free-to-access journal articles). The CCC was created, and is maintained, by Chris Nickson and originated from the FCICM exam study ... The 2016 Surviving Sepsis Guidelines have arrived, a remarkable document, all 67 pages with 655 references (1, 2). We congratulate the lead authors and contributing committee members. With each iteration, the guidelines grow more complex and perhaps more challenging to utilize. We offer guidance ... Intensive care medicine, or critical care medicine, is a branch of medicine concerned with the diagnosis and management of life-threatening conditions that may require sophisticated life support and intensive monitoring. The Pediatric Fundamental Critical Care Support (PFCCS) course joins SCCM's long-running Fundamental Critical Care Support (FCCS) course as resources for those interested in learning to recognize critical illness and initiate care for the critically ill pediatric patient in the absence of an intensivist.
