If you have found this book, either you or someone you love are suffering with a debilitating inner ear illness. My decision to write this book was born from the frustration with the lack of knowledge Marian has published the best selling book 'Recover from Labyrinthitis and Vestibular Neuritis – Finally!'; about recovery from, and management of, chronic Labyrinthitis and Vestibular Neuritis. Labyrinthitis (inflammation of the labyrinth) occurs when an infection affects both branches of the vestibulo-cochlear nerve, resulting in hearing changes as well as dizziness or vertigo. Bacterial and viral infections. Inner ear infections that cause vestibular neuritis or labyrinthitis are usually viral rather than bacterial.
