

Download Science Explorer Grade 6 Guided Work Answers

Experiment with an electronics kit! Build circuits with batteries, resistors, light bulbs, and switches. Determine if everyday objects are conductors or insulators, and take measurements with an ammeter and voltmeter. View the circuit as a schematic diagram, or switch to a lifelike view. Sites. We run program at several sites in the San Bernardino National Forest. Though the program, staffing and curriculum are all the exact same, each site offers a bit of unique character. Explore the forces at work when pulling against a cart, and pushing a refrigerator, crate, or person. Create an applied force and see how it makes objects move. Change friction and see how it affects the motion of objects.
