19 Feb 2019: Due to some unforeseen circumstances, the National Conference on “New Pedagogical Approaches and Avenues for Teaching and Learning in Technical Education” scheduled to be held on 22nd – 23rd February, 2019, is postponed to a later date during the month of April/May 2019. The rescheduled dates of the conference will be displayed in the website soon. A novel highly scalable multi-laser powder bed additive manufacturing approach for processing metallic alloys. • Near full melting of stainless steel alloy powder (99.7% density) using customised low power diode emitters (2.63 W).. Increased laser absorption and reduced laser power requirement through use of shorter laser wavelength. AE 100 Intro to Aerospace Engineering credit: 2 Hours. Introduction to the Aerospace Engineering curriculum and career. Typical section topics include aircraft and rocket design and flight. · ?????????????? · ?????????????????????????????????????? · ?????????????????????????????? · ??????dima????????????? · ?????????????????????? · ??????rcs??amc??????
