Suzuki's 6hp is a great choice for jon boats, folding Porta-Botes, skiffs, and inflatables, as well as auxiliary power for sailboats and "kickers" for larger fishing boats. The 6hp shares many of the 4hp features with enhanced features such as a larger carburetor for increased performance and an integral fuel tank and external fuel tank connection as standard equipment. The Suzuki 6HP 4 Stroke outboard motor or to give it its full name the Suzuki DF6A. I'd been looking at this particular model for a while now mainly because of its weight. My current Yamaha 9.9 4 stroke was a bit on the heavy side (43kg) and a bit difficult to man handle from my vehicle to the boat and back again. 2 stroke, tiller, manual start, 20" shaft, runs perfect. This is a 6 hp Suzuki long shaft outboard boat motor. This Suzuki 6 hp has a 20" shaft which makes it ideal for small sailboats or to use as a kicker on a fishing/cruising boat. This motor is very clean on the inside and outside.
