The Toyota E engine family is a straight-four piston engine series, and uses timing belts rather than chains. The E engines were the first multi-valve engines from Toyota designed with economy, practicality and everyday use in mind (rather than performance). Like many other Toyota engines from the era, the E engine series features a cast iron block, along with an aluminium cylinder head. Listed below are all the adverts placed for Toyotas within the modern car parts section on OCC, pulling together ads that have been placed on the existing specific Toyota model pages.
